BASISKEUZES

b & m

1. BASISKEUZES

1.1 STOFKEUZE

1. SCREEN

Screenstoffen bestaan in vijf verschillende gradaties van lichtdoorlaatbaarheid. Ze zijn ook afwasbaar.

2. PLAIN

Unistoffen, lichtdoorlatend.

3. TRANSPARANT

Doorzichtiger dan plain, meer contact met buiten.

4. BLACK-OUT

Deze stoffen blokkeren het licht: ze zorgen ervoor dat een kamer verduisterd wordt.

Ze zijn ideaal voor in een slaapkamer.

5. DUO

Duo-stoffen bestaan uit banen transparante stof, afgewisseld met banen die minder licht doorlaten.

Door twee van deze stoffen achter elkaar te hangen, kan het licht al dan niet doorgelaten worden.

Duo-rolgordijnen komen steeds in een box.

6. PRINTS

Dessins van uni-stoffen kunnen geprint worden op verschillende ondergronden.

1.2 AFROLMOGELIJKHEDEN

Er zijn twee mogelijkheden om uw gordijn af te rollen.

NORMAAL

Normaal betekent dat uw rolgordijn afrolt aan de raamzijde. Hierbij is de rol bovenaan ook zichtbaar.

Voordeel:

- Grotere lichtafdekking
- Plaatswinst op de vensterbank

Nadeel:

- De achterkant is zichtbaar bij het oprollen. Dit is vooral van belang bij black-out stoffen.

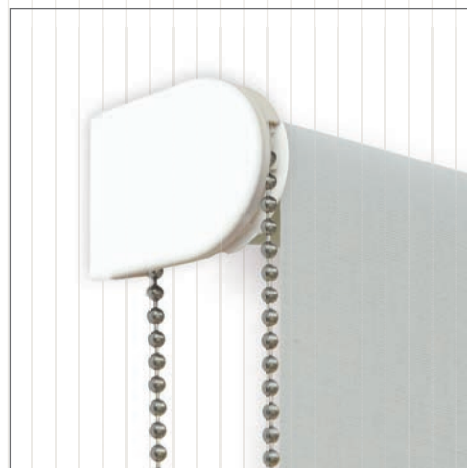

CONTRA

Bij contra hangt het gordijn voor de rol waardoor de spatie tussen het raam en het rolgordijn groter is.

Voordeel:

- Een grotere isolatiespouw bij raamkruk/klink
- Makkelijker om hoeken aan elkaar te zetten

! Contra rollend is niet mogelijk bij duo rolgordijnen

KOOF

Half-open / gesloten (zie p. 35)

Een rolgordijn dat in een koof zit kan enkel normaal worden afgerold. Hier kan u de keuze contra niet maken.

BASISKEUZES

Van de binnenkant bekeken.

1.3 BEDIENINGSKANT

LINKS

De ketting bevindt zich aan de linkerkant.

RECHTS

De ketting bevindt zich aan de rechterkant.

1.4 KETTINGGEWICHTEN

KUNSTSTOF = standaard

Wit

Grijs

Zwart

Afmetingen: a = 66 mm, b = 45 mm

METAAL = meerpijs

Nikkel

Brons

Nikkel

Brons

RECHTHOEKIG

ROND

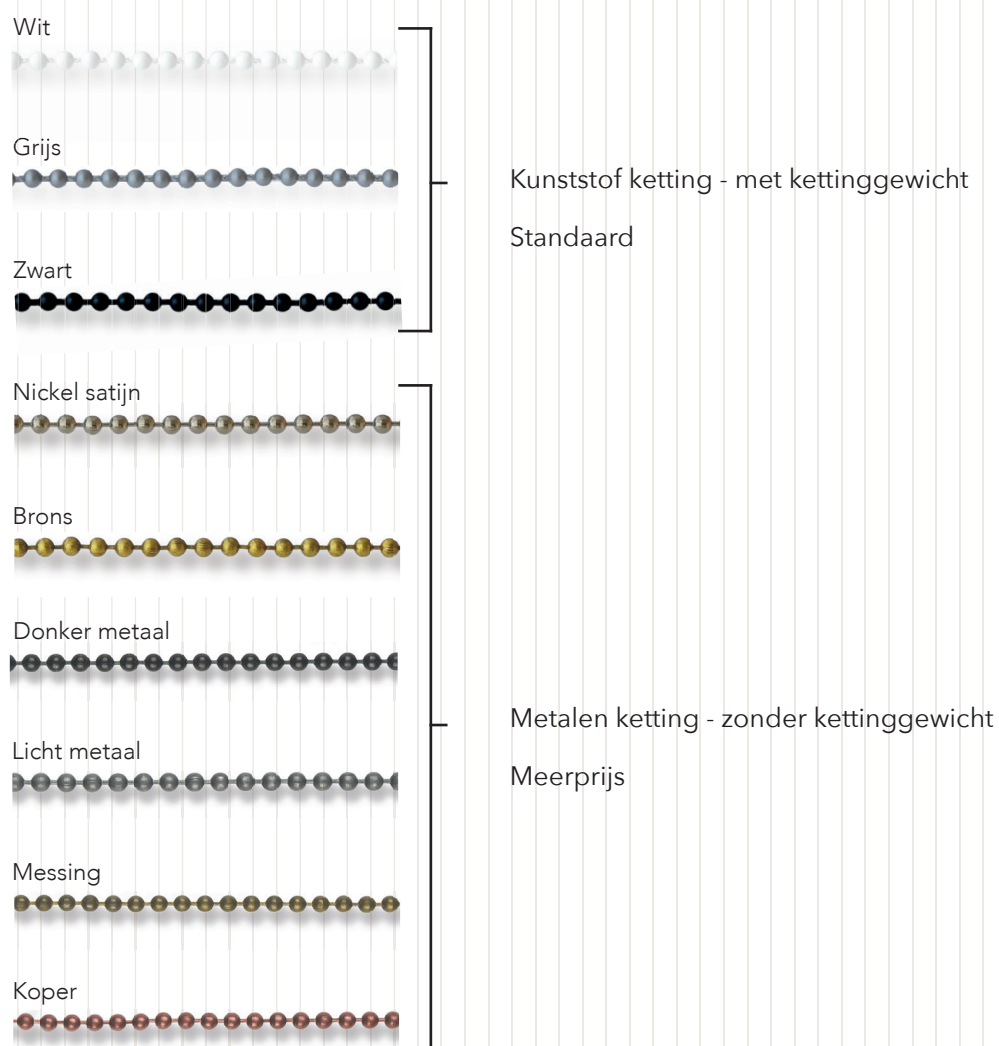

Afmetingen: a = 78 mm, b = 70 mm

1.5 KETTINGKLEUR

Het rolgordijn wordt altijd bediend met een ketting.

U kan een kettingkleur kiezen.

Standaard kiezen wij de kleur die het beste bij de kleur van het rolgordijn past.

1.6 KETTINGLENGTE

Bepaal hoe lang uw ketting moet zijn.

Lees p. 10 i.v.m. 'child safety'.

Tot een breedte van 3,40 meter

Enkel voor DUO

Enkel voor BIG

■ Geanodiseerd aluminium

Niet voor screens of dickere stoffen.

Houten onderlat - kleuren te kiezen uit de 5 standaardkleuren op pagina 15, of 'any color you want'.

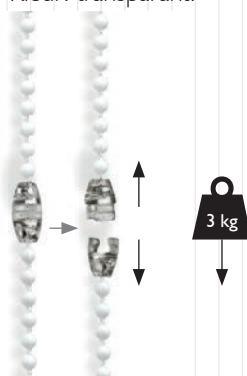

1.8 CHILD SAFETY

Veiligheidselementen

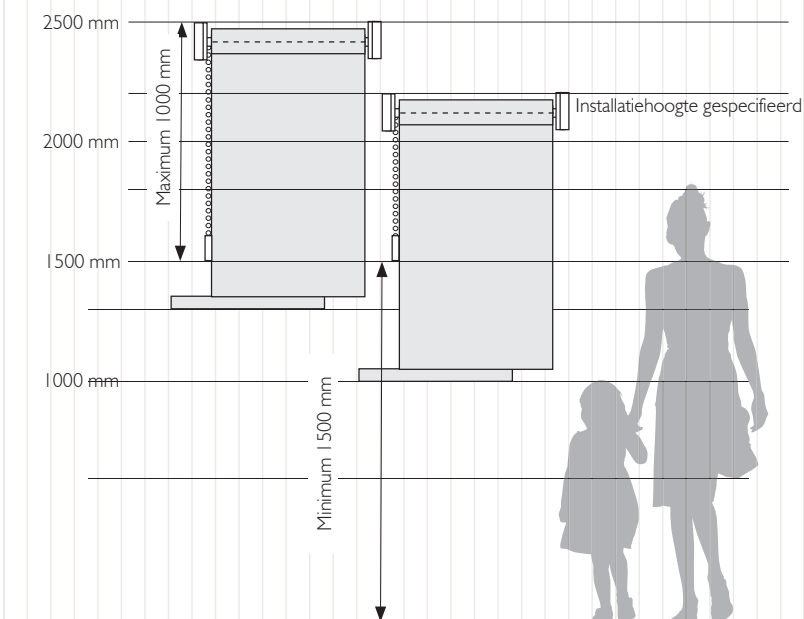

Kettingadaptor met de mogelijkheid om los te koppelen. Kleur: wit.

Balgekoppelde ketting met de mogelijkheid om los te koppelen. Kleur: transparant.

Kettinghouder om de ketting vast te maken aan de muur.

EN 13120

De Europese standaard eist dat raamdecoratieproducten zo ontworpen zijn dat kinderen zich hier niet aan kunnen kwetsen. In de praktijk wil dit zeggen dat de lengte van de bedieningstouwjes en/of ketting, alsook de bevestiging, onderworpen is aan de wetgeving hierover. Dit zorgt ervoor dat de kans tot verhänging bij kinderen tussen 0-42 maanden wordt gereduceerd tot nul. Bmfabrics levert bij elke bestelling van rolgordijnen een kettinghouder die bevestigd wordt aan de muur.

Als op het order de kettinglengte niet aangegeven is, zal Bmfabrics een kettinglengte meeleveren van maximum 1 meter. Wij vragen dus steeds om de kettinglengte op te geven, dit om misverstanden te vermijden.

!

WAARSCHUWING

Jonge kinderen kunnen verstrikt geraken in de lus van de trekkoorden, kettingen, banden en koorden waarmee de raambekleding bediend wordt. Ook kunnen ze koorden om hun keel wikkelen. Hou om wurging en verstikking te voorkomen de koorden buiten bereik van jonge kinderen. Verwijder bedden, wiegen en ander meubilair uit de buurt van raambekledingkoorden. Knoop de koorden niet aan elkaar. Zorg dat de koorden niet verstrengeld raken of een lus vormen.

2.3 BEDIENING

2.3.1 MANUELE BEDIENING

KETTINGBEDIEND

Zoals in de basiskeuzes besproken, kan je de keuze maken om het systeem manueel te bedienen.

Dit is steeds met een ketting, waarmee je het systeem op- en neerlaat.

2.3.2 ELEKTRISCHE BEDIENING

OP BATTERIJ 12 V - enkel bij buisdiameter 40 mm

A Bmfabrics-batterij = interne batterij - komt standaard met oplaadbare batterij

S Somfy-batterij = externe batterij - oplaadbare of niet oplaadbare batterijen

Lengte van de batterij: 8 stuks = 45 centimeter , 10 stuks = 55 centimeter

BEDRADE SYSTEMEN

Voeding	Bediening
230 V A Bm-motor	- Draadloze BM-afstandsbediening - Schakelaar/domotica
230 V S Somfy-motor	- Telis- & Modulis-afstandsbediening - Schakelaar/domotica

Al onze elektrische systemen hebben een stille motor.

DRAADLOZE BEDIENING

Het systeem kan draadloos bediend worden door de afstandsbediening van Bmfabrics of van Somfy.
Voor 12 V- en 230 V-systemen: vraag naar onze andere opties.

BM-standaard
1 of meerdere kanalen

Somfy Telis
1 kanaal

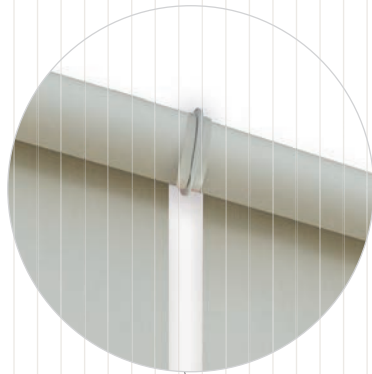

Somfy Modulis
1 of meerdere kanalen

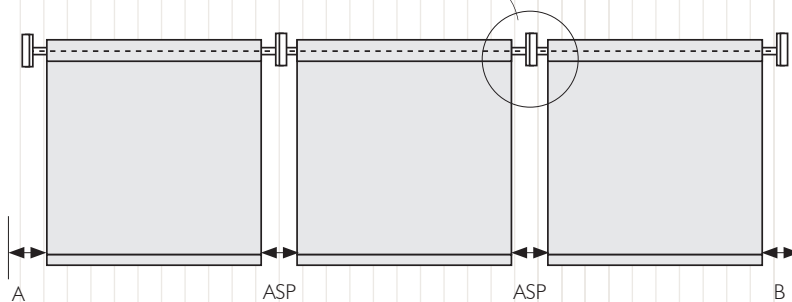

Somfy-schakelaar
1 kanaal

2.3.3 GROEPEREN*

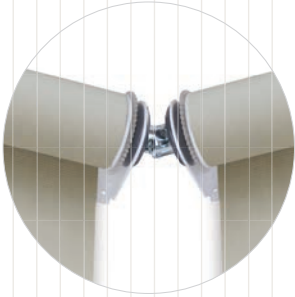

- Om 2 of 3 systemen te groeperen
- 1 aandrijving voor alle gegroepede systemen
- Het op- en neergaan van de rolgordijnen gebeurt tegelijk
- Max. 3 systemen aansluiten op 1 motor

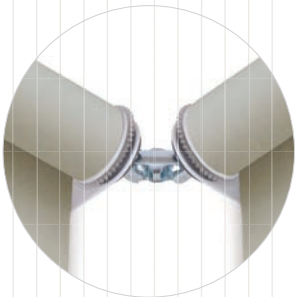

A
= afhankelijk van het
type van systeem

* **Opgelet:** om meerdere motorische systemen te koppelen en met één bediening aan te sturen, dient men altijd een relais te gebruiken.

REN

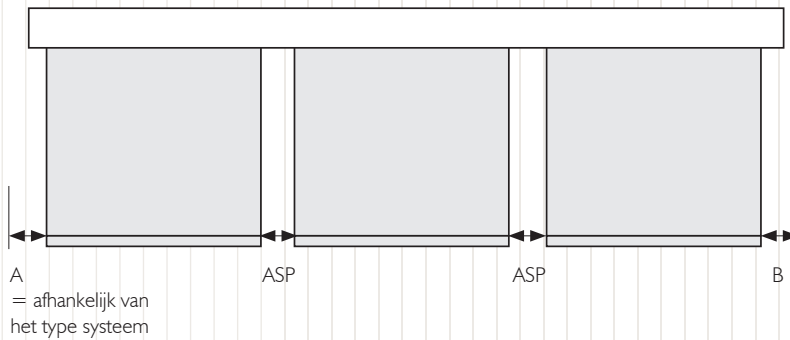

Groepering van een systeem onder een hoek van 0 - 45° zonder box.
Enkel voor REN 47

Groepering van een systeem onder een hoek van 0 - 90° zonder box.
Enkel voor REN 47

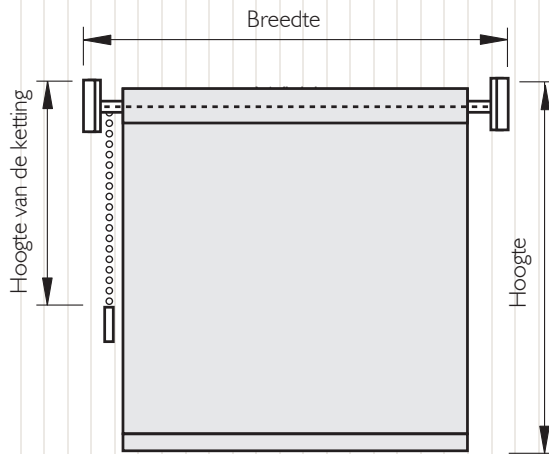

Groeperen van een groep met een box REN 86R - enkel voor REN 86S.

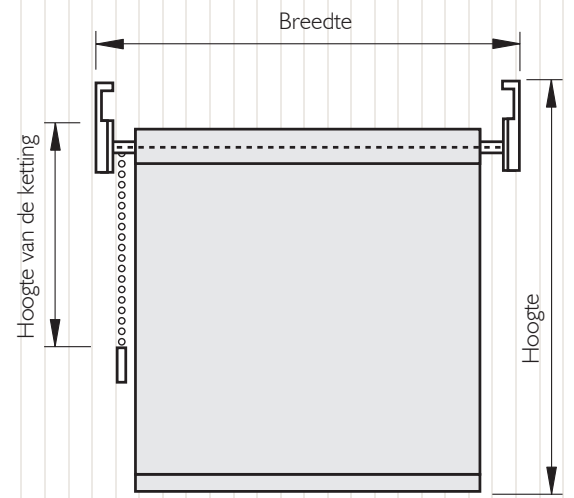

2.4 OPMETEN

Spannende breedte - gewilde speling: wij raden een minimum van 1 cm aan.

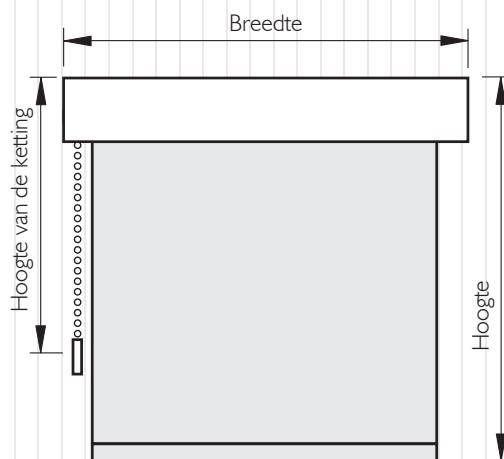

! Zorgenvrij: we hebben ook een plaatsingsdienst.

Muurbevestiging

Plafondbevestiging

Box

!

Indien de breedte van het systeem $1/3$ smaller is dan de hoogte, kunnen we geen perfecte werking garanderen.

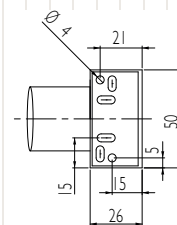

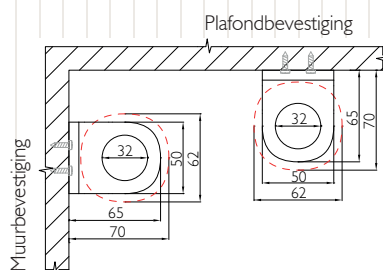

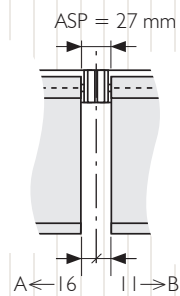

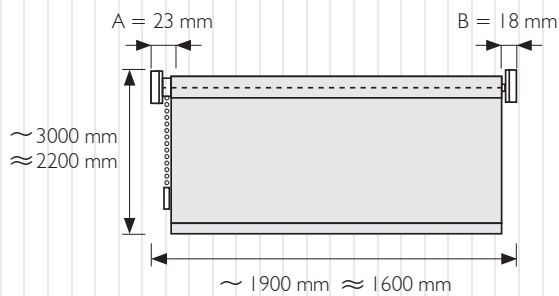

Als de bevestigingskeuze niet gespecificeerd is, kiest Bmfabrics standaard muurbevestiging.

We reduceren de maximum breedte met 20-30 cm voor zware stoffen en stoffen die krimpen.

DUO

GESLOTEN BOX SQUARE

Afmetingen: box 86 tot 220 cm lengte.

4.2.7 UITLIJNEN VAN DE STREPEN

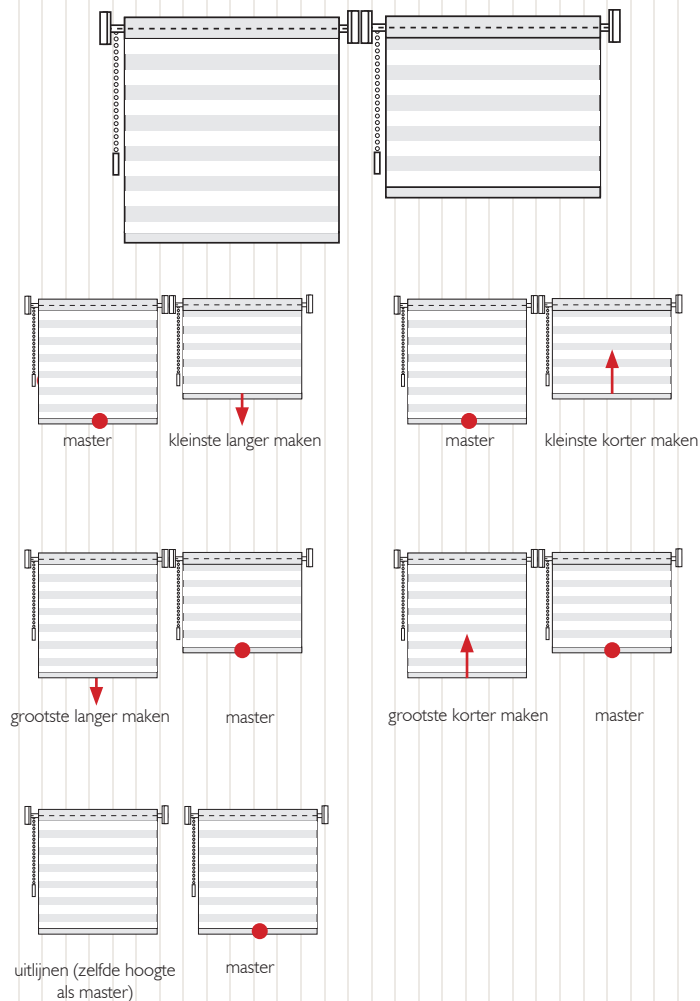

In de laagste positie is de DUO verduisterend doordat de strepen elkaar overlappen.

DUO gordijnen met verschillende hoogtes zijn moeilijk om uit te lijnen.

De strepen kunnen uitgelijnd worden bij een verlenging of verkorting van een van de gordijnen (max. 80 mm, de hoogte van een streep) met een tolerantie van ongeveer 5 mm.

! Specifieer bij de bestelling *altijd* hoe de DUO uitgelijnd moet worden, ook al zijn ze dezelfde hoogte!

Geef aan welk DUO de 'master' is en welke DUO daaraan aangepast moet worden.

In de ● positie overlappen de strepen elkaar

4.3 BEDIENING

4.3.1 MANUELE BEDIENING

KETTINGBEDIEND

Zoals in de basiskeuzes besproken, kan je de keuze maken om het systeem manueel te bedienen.

Dit is steeds met een ketting, waarmee je het systeem op- en neerlaat.

4.3.2 ELEKTRISCHE BEDIENING

OP BATTERIJ 12 V - enkel bij buisdiameter 40 mm

Bmfabrics-batterij = interne batterij - komt standaard met oplaadbare batterij

Somfy-batterij = externe batterij - oplaadbare of niet oplaadbare batterijen

Lengte van de batterij: 8 stuks = 45 centimeter , 10 stuks = 55 centimeter

BEDRADE SYSTEMEN

Voeding	Bediening

Het groeperen van meerdere DUO's kan enkel bij types 86R en 86S.

EEN BEDIENING PER SYSTEEM

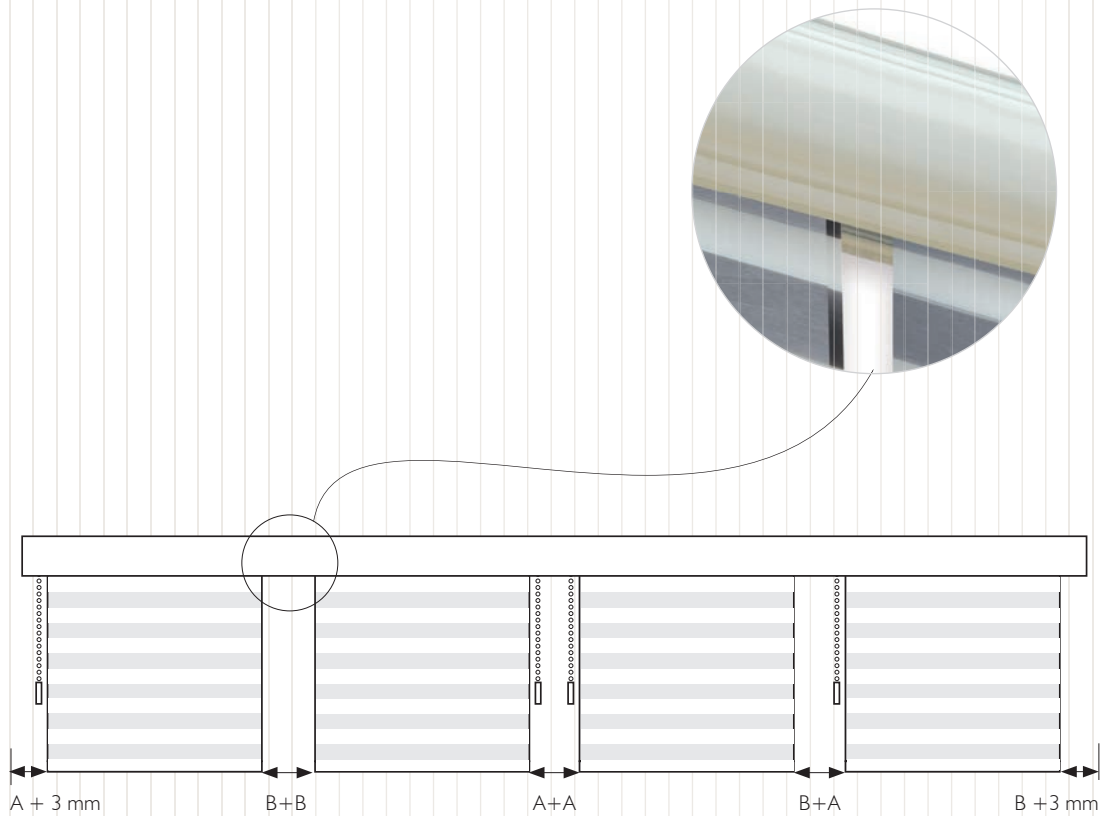

- Om 2 of 3 systemen te groeperen
- 1 aandrijving voor alle gegroepeerde systemen
- Het op- en neergaan van de rolgordijnen gebeurt tegelijk
- Max. 3 systemen aansluiten op 1 motor

A = afhankelijk van het type van systeem

* Opgelet: om meerdere motorische systemen te koppelen en met één bediening aan te sturen, dient men altijd een relais te gebruiken.

INDIVIDUELE BEDIENING

A = afhankelijk van
het type van systeem

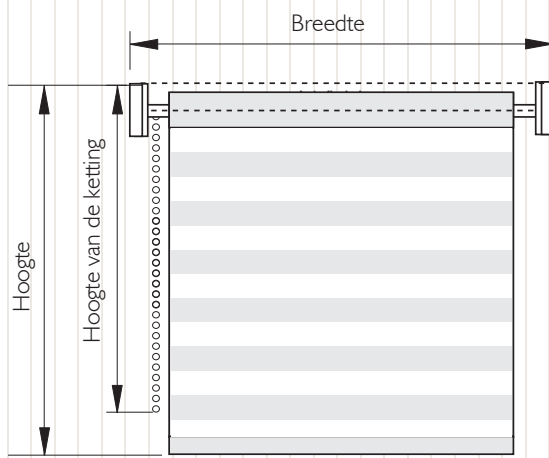

B = afhankelijk van
het type van systeem

- Om 2 of 3 systemen te groeperen
- 1 aandrijving per gordijn
- Het op- en neergaan van de rolgordijnen gebeurt individueel

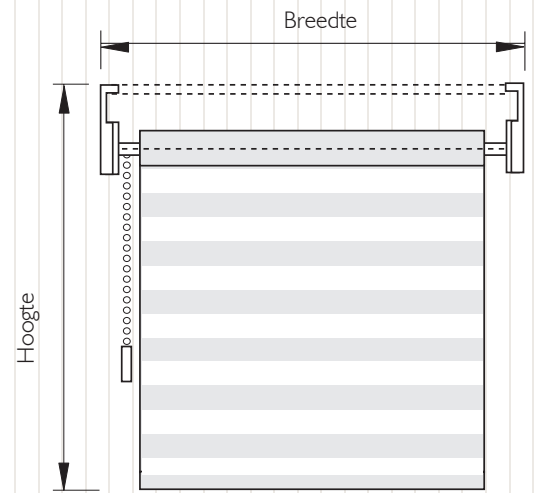

4.4 OPMETEN

Spannende breedte - gewilde speling: wij raden een minimum van 1 cm aan.

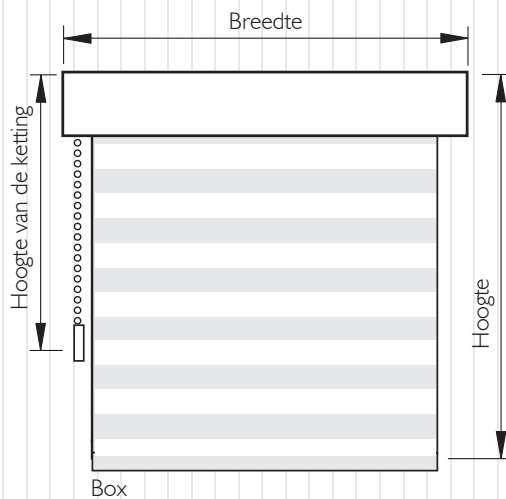

! Zorgenvrij: we hebben ook een plaatsingsdienst.

Muurbevestiging

Plafondbevestiging

Box

!

Indien de breedte van het systeem $1/3$ smaller is dan de hoogte, kunnen we geen perfecte werking garanderen.

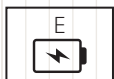

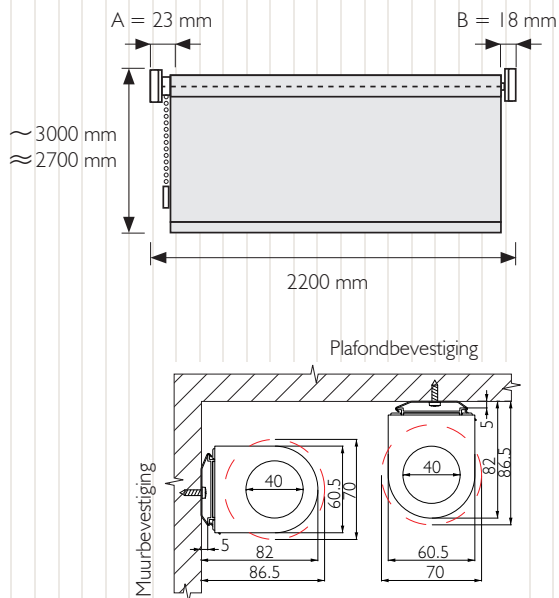

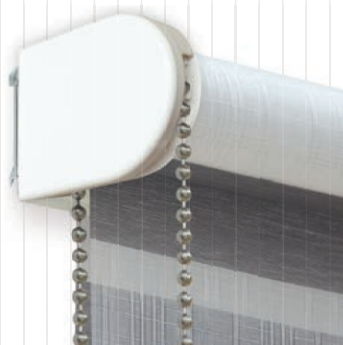

Als de bevestigingskeuze niet gespecificeerd is, kiest Bmfabrics standaard muurbevestiging.

We reduceren de maximum breedte met 20-30 cm voor zware stoffen en stoffen die krimpen.
