## FURY

Our Fury collection represents a burning consciousness that is ready to burst open. The current conditions are ripe for another explosion of anger-driven creativity. The collection looks at the dark, determined days of the early 1980s recession and finds striking parallels with our current political and economic state.

The collection includes 11 fabrics with warm, natural colors and textures to dream away from. Each fabric has unique and striking characteristics. In line with this, we chose to name the substances after fervor, explosiveness and the energy that comes from rebellion.

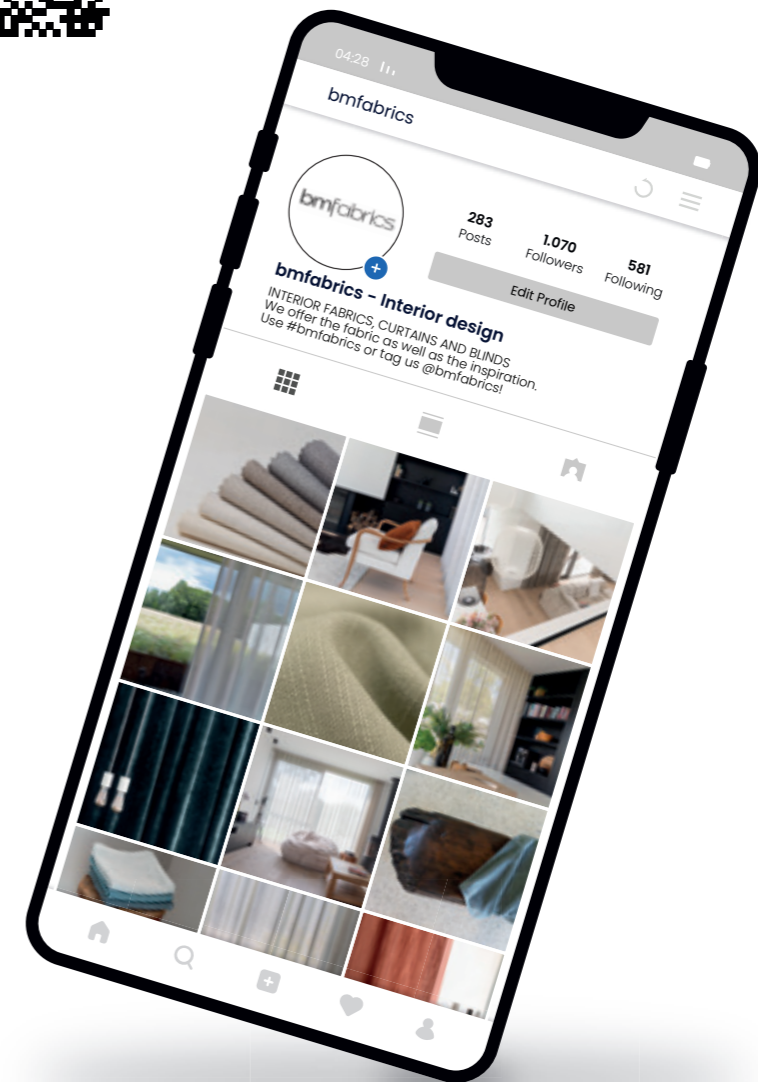

Let's look forward to this creative collection together.
