Transport costs

The franco rules apply per product group, as different product groups have different transport methods. This means that within the same order, one product group may be franco while another is not. For example, the following is calculated:

- fabric/made-up + rails = 2 product groups
- fabric/made-up + rails + hard window coverings = 3 product groups
- fabric/made-up + rails + hard window coverings + roman blinds = 4 product groups
- fabric (per metre) + fabric/made-up = 2 product groups
